Hello

Thank you for picking up one of our catalogues.

After the successful launch of our illustrated guide in 2022, we decided it would be a great idea to create a catalogue which could be downloaded from our website or sent via email, however sometimes you just need a paper copy.

Throughout this catalogue you will notice that each page or product has a QR code which will take you directly to the product on our website along with any relative equipment information. This unique feature will enable you to check equipment availability, look at user manuals and fill up a flight case.

We look forward to playing a part in your performance :)

Jo

Investment

We have recently invested over £200k into our new Prolights DeltaPix LED video wall and hardware which includes supporting structures, we have also doubled up on our RCF PA equipment.

This procurement has been eagerly awaited after several years of trying to find the right products to suit the needs of our clients.

2023/24 will see further investment into our hire stock.

Seaham High School, Matilda 2022, Prolites DeltaPix 4.8mm

5

Artistic Solutions are based in the North East, collection in person is great and whilst we love to meet our clients most of them live outside of our region and often prefer to receive a delivery.

We deliver equipment throughout the UK every single week.

UK Wide Delivery

Perfect for creating low lying fog, the Glaciator machine includes 5L of fluid, ducting kit and 10m of 32amp cable. Additional fluid maybe ordered using the drop box.

- On-board DMX
- On-board control panel
- Ducting system included
- Density control: low, medium or high
- Continuous output80 m2/min fog output
- 3500W heat exchanger
- 15 min heat-up time
- 5 litre fluid capacity
- Internal or external fluid supply
- Low fluid sensing
- Self-contained unit no co2 or dry ice

Equipment
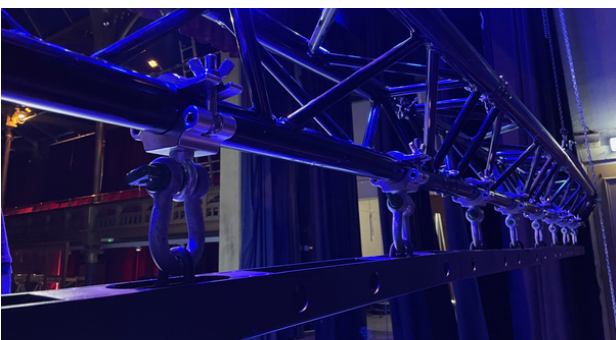

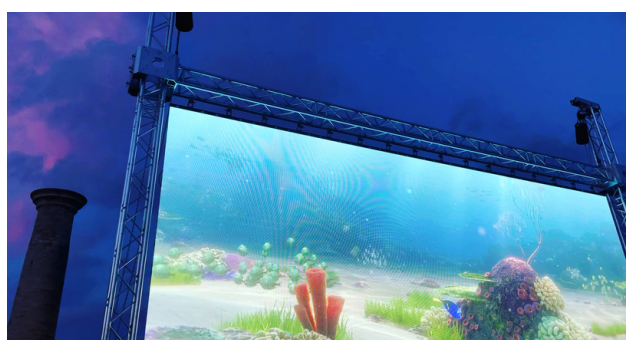

ROBe.

T11 Profile MFS™ (Follow Spot)

"The MSL-TE™ 350W LED Engine generating over 12,000 lm from the fixture.

This multi-spectral LED technology provides identical colour characteristics, responses, and control of T series luminaire, to give absolute colour consistency across your Robe lighting installation.

High-definition optics deliver precise projection, and the extreme, wide-ranging 10:1 ratio 5-50° zoom range, from its single, integral lens tube, without additional lens tubes or optical variants, makes it a highly flexible follow spot solution.

Our innovative manual shuttering system, functioning as an internal barn door, is both accurate and easy to use. Fitted in the fixture is a manual 1° MagFrost™ for instant softening, with a 5° MagFrost™ stored on the magnetic holder within the fixture"

Artistic Solutions are a leading provider of technical installation for schools, colleges, theatres and live event venues.

We specialise in theatre lighting, audio and curtains and offer a wide range of high-quality but cost-effective solutions to meet the needs of our clients.

Our technical installation services include design visuals, electrical installation and ongoing technical support. Our team of experienced technicians work closely with clients to design and install custom lighting and audio systems that meet their specific needs and budget.

Our electrical installation services are carried out by our team of highly skilled technicians who ensure that all systems are installed to the highest standards of safety and performance. We use only the best quality equipment and materials and our electricians are fully trained and certified to work on all types of electrical systems.

In addition to installation, we also provide ongoing technical support to ensure that our clients systems are always operating at peak performance.
